

AIR OPERATED BAGGING MACHINE

Newest Model "*EVOLUTION*" Italian Design

This great machine has earned the approval of our customers for very good reasons.

It is energy efficient and cost effective. It eliminates inventory of perforated poly. One continuous roll is placed on rollers at the base of the machine. The proper length of poly is pulled over each garment. The two air operated buttons will activate the mechanism which will cut and seal poly in one operation. It eliminates the cumbersome bagging jack pole.

Plastic continuous film 21" x 7" or 21" x 4", .006 thickness or heavier if desired.

Electrical voltage	110V
Electrical frequency	50/60 Hz
Maximal potency	166 Kw
Work pressure	6 bar - 70 psi
Dimensions	L 620 mm - 24.8"
	H 2000 mm - 80"
	D 540 mm - 21.6"

Total weight 60 kg - 132 lb.
Some assembly required.
